

INDUSTRACK MT-300

Electronic Onboard Recording System (EOBR)

Paperless HOS reporting and easy DVIR, IFTA and IRP filing: A complete certified compliance solution.

COMPLIANCE. SAFETY. EFFICIENCY. PRODUCTIVITY.

IndusTrack

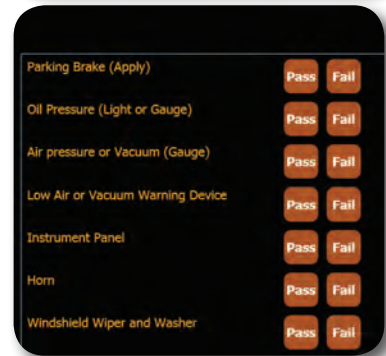

Are you ready for the new safety standards in CSA2010?

Don't let tougher new safety regulations shut you down. Put the IndusTrack MT-300 EOBR system to work – and keep your trucks rolling.

The MT-300 automatically records, transmits and archives information to comply with hours of service (HOS) and the new CSA 2010 safety standards. The device also complies with both FMCSA 395.15 and the new 395.16 EOBR regulations.

From your vehicles to your office, the MT-300 streamlines regulatory compliance. In addition to HOS, it generates the information and reports you need for:

- IFTA (International Fuel Tax Agreement) calculation and reporting
- IRP (International Registration Plan) reporting
- DVIR (Daily Vehicle Inspection Reporting)
- Other federal and state regulations and requirements that you define

Are you maximizing productivity? Are you operating at top efficiency?

Think of the MT-300 as an extra set of eyes, eyes that can “see” and transmit in real-time what’s going on with your vehicles: where they are, when they’re at a job site and for how long, how the engine is performing and what’s happening with other critical aspects of their operation. In addition to helping you with compliance, the MT-300 serves as a key tool in maximizing your fleet.

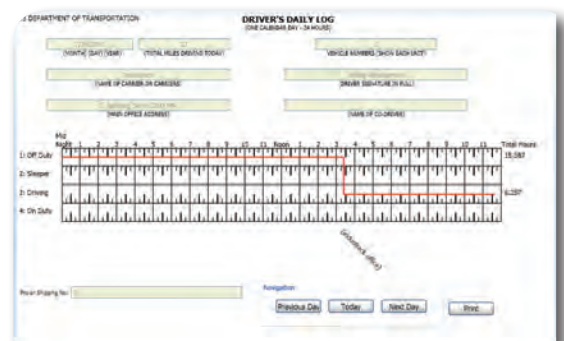

Advanced sensors fully integrated with the MT-300 system and strategically linked to the engine and other functionalities provide intelligence unmatched by other systems. With the IndusTrack system, you select the performance aspects to monitor. Choose those that matter most to your fleet’s productivity and efficiency, including:

- Location, timing and duration at site
- Early warning of engine problems
- Excessive idling
- Engine emissions
- PTO (Power Take Off) up to 4
- Hard braking
- Quick acceleration
- Specialized truck navigation
- Vehicle height, weight, width and length limits
- Low bridge heights and clearances
- Hazardous materials restrictions

Use intelligence from the MT-300 system’s patent-pending sensors and user-friendly software to improve your bottom line:

- Reduce fuel, labor and maintenance costs
- Improve safety and reduce violations
- Manage routes for greater efficiency and improved customer service
- Schedule preventive maintenance before a major problem occurs

Date/Status	Driver	Driver ID	Driving Time	Sleep Time	Work Load	Vehicle ID	Last Duty Change	Location	HOS Rate
Driving	Steve Anderson	88	1:20	1:45	80%	A	11/20/2010 11:45:28 AM	(IndusTrack office)	95%
Off Duty	Steve Anderson	88	1:20	1:45	80%	A	11/20/2010 8:04:41 AM	(IndusTrack office)	95%

Off Duty	Steve Anderson	88	1:20	1:45	80%	A	11/21/2010 8:04:41 AM	(IndusTrack office)	95%

The IndusTrack Difference: Systems to meet your needs, not ours.

There's nothing cookie-cutter about your tracking and monitoring requirements. So why should you have to rely on a one-size-fits-all EOBR? You shouldn't.

That's why IndusTrack designs flexible EOBR solutions that allow total customization. You monitor what you want to monitor – and nothing more. And when your needs change – or as regulations change, the MT-300 system can be easily adapted. That means, when things change, you don't have to invest in a totally new system – and your return on investment continues to grow.

ACCESS TO COMPLETE VEHICLE DATA IN ONE CONVENIENT PLACE

It's also why our system is designed to integrate data gathered by all vehicle sensors into one convenient interface. With the MT-300, there's no need for multiple systems, which often are unable to assemble critical information in one easy-to-use place.

Our commitment to customized solutions also extends to how we do business. That's why we offer the MT-300 for purchase or lease. The choice is yours.

We welcome the opportunity to learn more about your compliance and fleet management challenges – and to demonstrate how the IndusTrack MT-300 can help you meet them.

To request a demonstration video of the MT-300, or for more information, contact IndusTrack at 612.746.4017 or sales@industrack.com, or visit us at www.industrack.com.
